Test Scenarios (WIN-WIN screen)

Scenario 1: When user has avail offer after delivery(given in point 5)
GIVEN A order has been deliver and as soon as status has been updated user needs to be notify about these points using a notification.
WHEN User will access this notification
THEN he needs to be redirected to splash screen with total points should be display.(As given in image screen1).

Scenario 2: To view all the points
GIVEN After points has been shown to user
WHEN user will click on see all earned point
THEN he needs to be redirected to WIN WIN screen where total earning will be shown of that user.

Scenario 3: Points must be update after each and every point addition or avail offer
Case 1:
GIVEN User already has been avail many points from multiple point schemes.
WHEN User perform a new transaction using these points then point should be decrease according to the usage.
(If user has 100 points or amount and place order worth of 50 then and pay using these points then after transaction has been successful wallet should be update with the value of 50).
THEN wallet should be update as per transaction or pay method.
Case 2:

GIVEN User already has been avail many points from multiple point offers and according to the same wallet amount(point wallet or amount wallet) should be update.
WHEN User has avail one more offer for earn point.
THEN Wallet amount should be update as per availed offer(If previous amount was 50 and user availed a offer with the value of 20 points then these points

must be added into previous points and value of wallet and total earning should update)

Case :3 (If transaction has been failed)
GIVEN If user has enough points
WHEN User perform a transaction using those points and points gets deducted from wallet
THEN due to some error transaction gets fail then whole transaction should be revert including deducted point.

Scenario 4: If user cancels order before delivery
GIVEN If user has placed and order
        WHEN User is eligible for a point reward and user cancel order in the middle of any sage (before delivery)
        THEN User should not be able to allow to get any reward.
BUT WHEN but if user again place order again and eligible for earn points
THEN After delivery user should be able earn point and must be notify about
The same point amount.

Scenario 5: WIN-WIN screen
GIVEN A link in menu should be given for check balance for earned point
WHEN user will click this menu
THEN first user should be able to see all earned points till the same day.

Scenario 6: WIN WIN=> How to earn more point
GIVEN A button in win win screen where user is able to see total earn point
WHEN User click this button
THEN user will be redirected to a screen where all the currently available offers will be shown .

Scenario 7: Earned Points update
GIVEN Total value of points which user has been earned.
WHEN User earn a new value of amount
THEN wallet should be update as per the point amount.(if user had 50 point and earned 20 points from a new transaction then after update total value should be 70)

Scenario 8: Available offers

GIVEN WIN WIN screen but some offers should be shown.

WHEN User clicks on any offer if **get now** button is enable (avail button should be enable where user has enough point to avail and also total needed point must be given.)

THEN That offer should be activated for user and needed point for avail that offer should be deducted from wallet (or total point).
